Dear STOHN Member,

Oral cancer, largely oral squamous cell carcinoma, is a global health problem afflicting over 300,000 people each year. In the United States alone, greater than 37,000 new cases and nearly 8,000 deaths in 2013.

We are attempting to assess current knowledge amongst dental professionals regarding oral cancer. This will help us develop future educational programs in this area.

Clinicians who choose to participate are asked to complete a 12 question survey. The survey should take less than five minutes to complete.

Please contact the STOHN Network Coordinator, Colleen Dolan, at (210) 562-5652 or dolanc@uthscsa.edu with any questions about the study.

Requirements:
1. Enrollment in STOHN
2. Completion of a five minute survey
