

Psychiatry PBRN Card

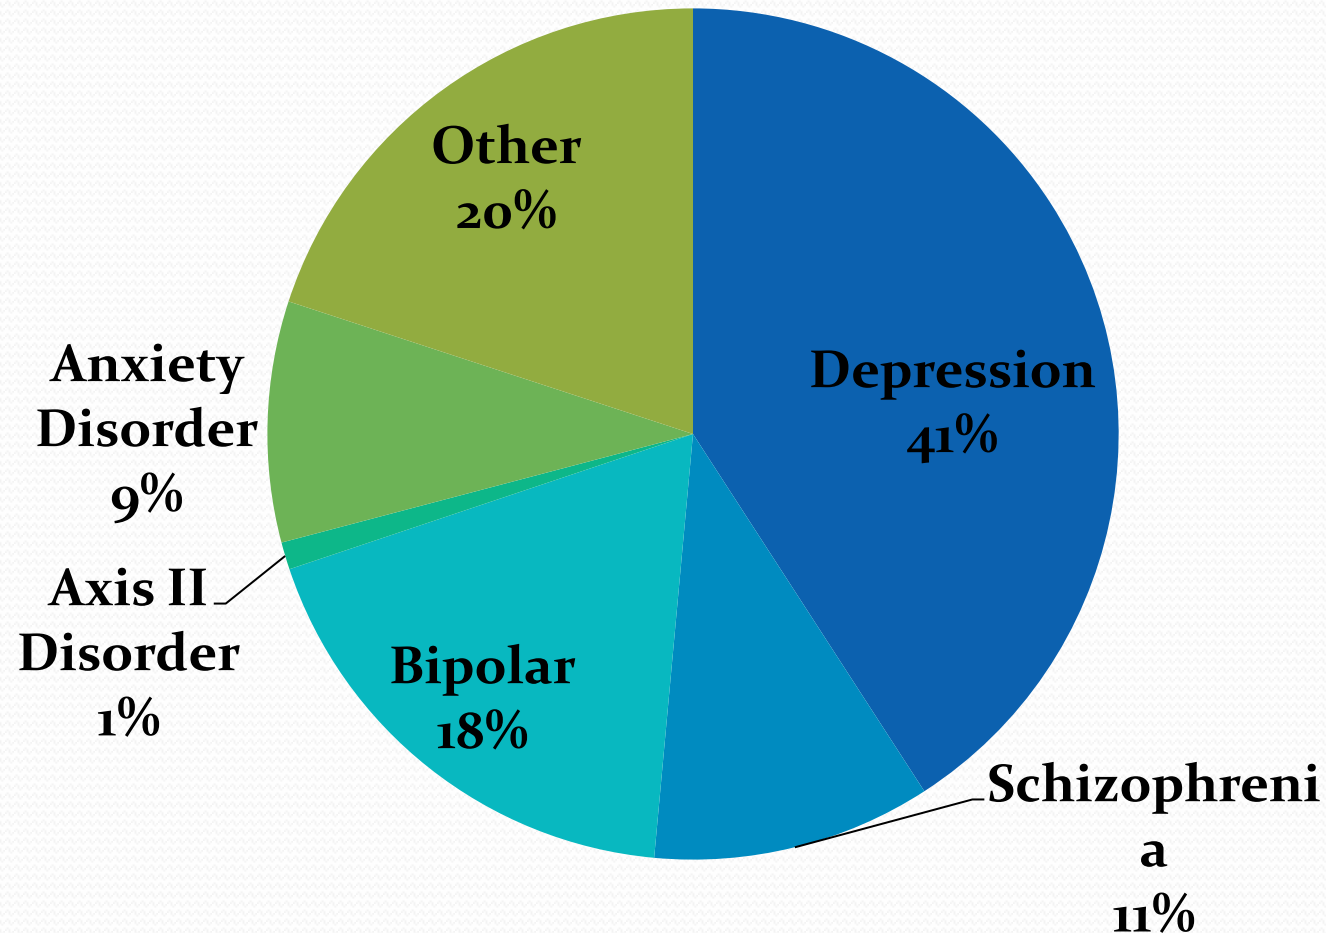

Study #1

Negative Countertransference

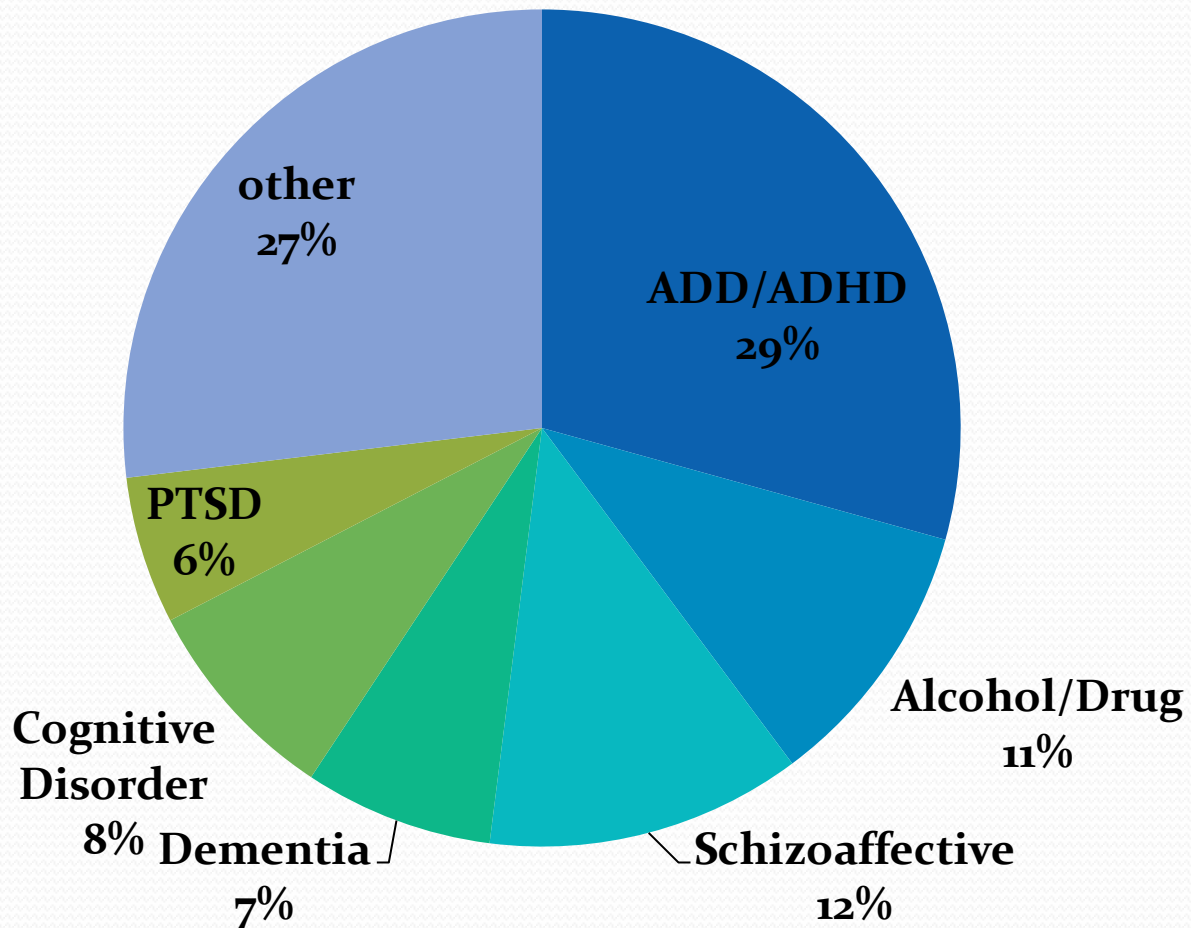

Overview

- For four consecutive weeks 11 Psychiatrists chose one day a week to fill out a study card that documented setting, primary diagnosis and if they had a negative reaction to their patient.
- Cards were filled out immediately following the visit and cards were filled out regardless of negative reaction to the patient.
- Over 500 study cards were completed over those four weeks.

Primary Diagnosis N=501

Other Diagnosis N=123

Did you have Negative Reaction to Patient Total?

	Number	Percent
Yes	48	10%
No	448	90%
Total	496	100%
