

Unlock the Power of Translational Science Communication for Impact!

Are you ready to revolutionize how you share your scientific discoveries with the world? Join our groundbreaking **Translational Science Communication for Impact** ([TSCI](#)) training program from the *Institute for Integration of Medicine & Science*.

Demand and expectations are growing for research disseminate beyond traditional academic journals to influence clinical practice, public health, and policy audiences. Join us in the TSCI to develop skills in communicating with real-world impact!

Apply now at: [APPLY NOW](#)

Who should participate: Faculty or those participating in IIMS training programs. A cohort of 10 participants will be selected for the inaugural class.

Orientation and Training Kickoff: 2-3pm February 28 and 2-4pm March 27, 2024.

Why Choose Our Program?

1. **Tailored Curriculum:** Our program is designed to meet your unique needs, ensuring relevance and immediate applicability to your career.
2. **Expert Guidance:** Learn from seasoned experts in science communication who have successfully bridged the gap between academia and the public.
3. **Networking Opportunities:** Connect with a vibrant, like-minded community, fostering collaboration and exchanging ideas.

Translational science benefits drive downstream health, economic, and policy impact via communication of discovery. Your competency to reach beyond academia to specialized audiences opens doors to:

1. **Public Engagement:** Connect with the broader community, fostering a deeper appreciation for the relevance and significance of your research.
2. **Policy Influence:** Shape public policy by articulating the societal implications of your work and advocating for evidence-based decision-making.
3. **Interdisciplinary Collaboration:** Foster collaboration with professionals from diverse fields, unlocking the potential for groundbreaking interdisciplinary projects.
4. **Funding Opportunities:** Enhance your ability to secure grants and funding by communicating the societal impact and relevance of your research.

Step into a future where your research not only contributes to the academic world but resonates with the global community. Embrace the transformative journey of *Translational Science Communication for Impact!*
